

Blue Horizons Ultimate Phos Away

Key Features/Characteristics

- 🔑 Highly concentrated phosphate remover & clarifier
- 🔑 Phosphate removal means fewer algae problems
- 🔑 Less cleaning & vacuuming. Reduced pool maintenance

This dual-action product is a highly concentrated phosphate remover and clarifier. Excess phosphates in pool water act as an algae nutrient resulting in rapid and sustained algae growth. Blue Horizons Ultimate Phos Away will rapidly reduce excess phosphate levels. The product is compatible with all recognised sanitisers.

Application Instructions

1. Maintain pH levels within the range 7.2 – 7.6. If not in this range, adjust.
2. Treat any visible algae prior to applying Ultimate Phos Away.
3. Use a reliable phosphate test kit to establish your phosphate level.
4. Check the filter pressure and if necessary backwash the filter prior to dosing the product.
5. Shake the bottle well before use.
6. Slowly add via a clean and empty skimmer. Alternatively, gradually pour the product into the pool with the pump(s) turned 'on', preferably near the water inlets to aid distribution.
7. Run the filtration constantly for at least 24 hours. Backwash the filter if required.
8. Re-test the phosphate level and where needed, add a further dose.

Dose Rates					
Water Volumes		Phosphate levels			
Litres	Gallons	200 – 1000ppb*	2000ppb*	4,000ppb*	6,000ppb*
22,730	5,000	71ml	142ml	285ml	425ml
45,460	10,000	142ml	285ml	565ml	850ml
68,190	15,000	213ml	425ml	850ml	1.275ltr

* Parts per billion

Note: The pool water may become temporarily cloudy after product application. Blue Horizons Aqua Sparkle Tablets or JellyCLEAR Cubes will help reduce cloudiness.
