

## AquaSPArkle Hot Tub Flush

### Key Features/Characteristics

- 🔑 Liquid
- 🔑 Spa pipework cleaner

Hot Tub flush is a powerful liquid pipework cleaner. Use just prior to draining down the hot tub.

### Application Instructions

1. Apply product directly to the spa skimmer basket whilst the pumps are turned on to aid distribution.
1. Leave the treated hot tub for a minimum of 12 hours (i.e. overnight) prior to draining down and replacing hot tub water.

| Dose rates    |         |       |
|---------------|---------|-------|
| Water Volumes |         |       |
| Litres        | Gallons |       |
| 1,000         | 220     | 200ml |
| 1,500         | 330     | 250ml |

**Note:** Handle product with care.
